STD-120 Caravan Alarm

STD-120 alarm system will ward off any potential intruder of your investment. They can be used in static caravans, chalets as well as mobile caravans and motorhomes.

The system is wireless and fits externally as a strobe / siren picking up wireless sensors inside the caravan. The unit can also receive the sensors from our GSM alarm range and be used as an additional external siren / strobe with them.

Intruder detection by simply learning wireless detectors into the panel.

Smoke, fire and LPG gas sensors also available which can be easily learned into the system for protection.
