

GSM Security Systems

GSM-230 Caravan Alarm

GSM-230 alarm system will alert you of any problems with security of your investment. They can be used in static caravans, chalets as well as mobile caravans and motorhomes.

Text Messages & Phone Calls are sent to up to 5 numbers when an intruder or sensor is triggered.

Intruder detection by simply learning wireless detectors into the panel.

Wired Sensors can be added and the text message changed as required such as 'flood detected' or 'power fail'.

Audio Monitoring allows you to listen in to what is happening locally before calling the police or security.

Remote Control 2 circuits via relays to systems such as heating, cooling, generators and more with a simple phone call to switch on and off systems.

Smoke, fire and LPG gas sensors also available which can be easily learned into the system for protection.
